Professional Summary

Results-driven **Cloud Engineer** with **2+ years of experience** in **Power BI, SQL, and Azure-based data platforms**. Expertise in **dashboard development, data modelling, and ETL pipeline operations**, with strong focus on delivering scalable and insight-driven solutions. Proficient in **Power BI Service management, data gateway configuration, and Row-Level Security (RLS)** implementation. Skilled in **SQL query optimization, data transformation, and cloud data workflows** using Azure and Databricks. Committed to enabling data-driven decision-making through reliable, high-performance analytics systems.

Professional Experience

LTM

Cloud Engineer (June 2024 – Present)

- Developed interactive **Power BI dashboards** and reports, enabling stakeholders to derive actionable business insights.
- Performed **data extraction, transformation, and loading (ETL)** using **Power Query** from multiple heterogeneous data sources.
- Administered **Power BI Service** including workspace management, dataset governance, and role-based access control.
- Configured and maintained **on-premises data gateways**, ensuring secure and reliable connectivity between cloud and local systems.
- Implemented **Row-Level Security (RLS)** to enforce data governance and secure access controls across user groups.
- Monitored and optimized dataset refresh cycles, improving reporting reliability and reducing data latency.
- Managed dataset connections, permissions, and governance policies aligned with organizational standards.

SQL and Data Engineering Contributions

Cloud/Data Engineer

- Developed and optimized complex **SQL queries** using **JOINS, CTEs, and window functions** for large-scale data analysis.
- Designed and maintained database structures including **tables, views, and stored procedures** ensuring scalability and integrity.
- Improved query performance through **indexing and query tuning**, reducing execution time and enhancing reporting efficiency.
- Applied **data aggregation and grouping techniques** to support analytical reporting and business decision-making.

Education

Bachelor of Technology in Information Technology

2019 – 2023

Gayatri Vidya Parishad College of Engineering, Visakhapatnam

CGPA: **8.42 / 10**

Projects

Real-Time Sign Language Detection System

Python, OpenCV, TensorFlow, NumPy, Pandas

- Developed a real-time system to detect and interpret sign language gestures using **machine learning models**.
- Processed live video input using **OpenCV** for real-time image capture and feature extraction.
- Trained **TensorFlow models** for gesture recognition, enabling accurate prediction and translation.
- Implemented data preprocessing and transformation pipelines using **NumPy and Pandas**.

Technical Skills

Languages & Frameworks: Python, PySpark

Databases: SQL

Cloud Platforms: Microsoft Azure

Data Platforms: Databricks, Microsoft Fabric

BI & Visualization: Power BI, DAX, Power Query

Core Concepts: Data Modelling, ETL Pipelines, Data Governance, Query Optimization
